This position is located at Dossia's offices in Boston, MA near Downtown Crossing. MBTA Accessible.

About Dossia

Dossia Service Corporation's goal is to Create and operate a sustainable, secure and private health data repository system.

Dossia is building an independent, secure infrastructure for gathering and securely storing information for lifelong health records. At the request of employees and other eligible individuals, Dossia gathers health data from multiple sources. Employee participation as a Dossia user is completely voluntary and individuals have complete control over who sees their information. Once gathered and securely stored in a decentralized database, health information is continually updated and is available to individuals for life even if they change employers, insurers, or doctors.

How To Apply

Qualified candidates should send their resume to jobs@dossia.org .
